Skills

- LangChain | LangGraph | LangSmith | RAG | pgvector | OpenAI SDK | Vercel AI SDK | OpenRouter | Gemini API | Function Calling | Evals
- Claude Code | Cursor AI | GitHub Copilot
- TypeScript | React | Vue | Next | Git | CI/CD | Jest | Unity 2D
- English, Mandarin, Malay, Cantonese

Projects

- **EXPENSE TRACKER (AI Assistant):** AI agent with function calling and human-in-the-loop confirmation before any write. React Native/Expo mobile app and a Next.js web app, both backed by a LangChain agent on Cloudflare Workers with switchable AI provider (OpenRouter/Gemini). Includes a WhatsApp Bot supporting text, voice note transcription, and receipt image OCR. (React Native, Expo, Next.js, LangChain, Supabase, OpenRouter, Cloudflare Workers, WhatsApp Cloud API) ([FE](#)) ([BE](#))
- **PORTFOLIO RAG AGENT:** LangGraph ReAct agent on Cloudflare Workers with tool-calling retrieval backed by Supabase pgvector (Gemini Embedding 2, 3072-dim). Custom LangChain BaseRetriever, session memory via Cloudflare KV, and LangSmith tracing. Achieved 9/9 hit rate in retrieval evals. (LangChain, LangGraph, LangSmith, pgvector, Gemini, TypeScript) ([FE](#)) ([BE](#))
- **AI CODE REVIEWER:** LangGraph workflow triggered by GitHub Actions that fetches PR diffs, retrieves relevant review rules via Supabase pgvector RAG, and posts inline comments + summary to the PR via GitHub API. Reusable as a shared GitHub Actions workflow across any repo. (LangGraph, LangChain, Supabase pgvector, Gemini, GitHub Actions, TypeScript) ([Github](#))

Experience

Specialist, Front-End Developer

TNG Digital

Bangsar South, KL

09/2025 - Present

- Leveraged **Cursor AI** and **Claude Code** to accelerate feature development, assisting with **TSD** drafting, code generation, and debugging across the SDLC.
- Applied **AI-assisted** workflows during **PRD** analysis and **TSD** preparation to speed up technical documentation and implementation planning.
- Maintained and developed TNG **Mini Programs** within the tngd-mobile project, building responsive and interactive in-app experiences using **Vue.js**, **TypeScript**, and support on the **Mini Program** platform.
- Built and maintained web application projects in TNG app using **Vite**, **Vue 3**, **Pinia**, and **TypeScript**, following a modular and scalable frontend architecture.
- Supported **production releases** on duty and tracked security compliance using **Polaris** and **Black Duck**, performing **SCA** and **SAST** measurements to strengthen application security and release readiness
- Contributed to a **government** project by supporting requirements analysis, development, testing, and delivery while working within formal project and compliance standards.

Besquare Trainee -> Front-End Developer

Deriv

Cyberjaya, Selangor

03/2023 - 09/2025

- **Integrated a back-office system using OutSystems**, enabling other departments to independently manage events for partners without requiring front-end changes, improving efficiency and reducing dependencies.
- **Enhanced the Partner website UI** by implementing front-end updates and integrating backend APIs using **OutSystems**, ensuring a seamless user experience and streamlined operations.
- Played a key role in developing and maintaining the company-wide UI library as part of the **Design System** squad, contributing to the creation of reusable UI components and design assets to streamline development processes for other project teams.
- Fostered close collaboration with design teams to ensure seamless integration of design principles across user interfaces.
- Leveraging Jest library for robust test case implementation to ensure the reliability and functionality of design system components.
- Applied **Next.js**, **Gatsby**, and **React** to craft responsive, intuitive front-end interfaces, prioritizing user experience.
- Conducted comprehensive code reviews and offered actionable feedback to uphold code quality standards.
- Maintained expertise in emerging front-end technologies and industry best practices, consistently enriching the design system's capabilities.

Education

Bachelor of Science (Multimedia)

Universiti Utara Malaysia

Sintok, Kedah

07/2017 - 05/2022

- The aim of the programme (BSc. (Hons.) Multimedia) is to produce graduates with competitive knowledge, principles, and skills in terms of theoretical and practical foundations for designing, implementing, and managing multimedia applications, while also recognizing the impact of multimedia on individuals, organizations, and society.
